Sarvesh Karandikar

Senior Software Engineer | AI, Infrastructure & Cloud Systems

sarvesh1karandikar@gmail.com linkedin.com/in/sarveshkarandikar github.com/sarvesh1karandikar resume.sarveshk.dev

PROFILE

Senior Software Engineer at Cisco building multimodal AI agents and developer platforms. Experience spans cloud networking, Kubernetes security, backend systems, and applied machine learning.

EXPERIENCE

Senior Software Engineer | AI Canvas
Oct 2025 - Present

Cisco Systems

- Built multimodal agent workflows for images, documents, and network captures across fast and plan-execute modes.
- Designed secure file handling from gRPC through presigned S3 streaming, Redis manifests, and MCP file-reader tools.
- Own the Knowledge-Base SDK and skill/MCP-server registration for partner onboarding.

Software Engineer | Nexus Dashboard
Nov 2023 - Sep 2025

Cisco Systems

- Designed Kubernetes certificate management for CA creation and secure service signing.
- Extended external-CA support for XE/XR devices and built agent-based Postgres/TSDB management.
- Implemented an SPI-based Java leader-election framework for active-standby configurations.

Software Engineer | Cloud Network Controller
Jul 2020 - Oct 2023

Cisco Systems

- Integrated GCP into a model-based cloud-networking solution alongside AWS and Azure.
- Built L4-L7 config-drift detection, Terraform collection into a graph database, and BDD-based firewall-flow analysis.

WordPress Developer
2019 - 2020

USC Supply Chain

- Developed custom themes, plugins, and REST API integrations; managed hosting, deployments, and performance for university supply-chain projects.

ML Engineer Intern
2019 - 2020

Circle Link | Fintech

- Built NER and Elasticsearch workflows for loan documents; fine-tuned OCR/MICR check recognition.

TECHNICAL TOOLKIT

Languages
Python, Go, Java, C++, TypeScript, GraphQL

AI & agents
Claude Agent SDK, MCP, RAG, Amazon Bedrock, PyTorch, TensorFlow

Infrastructure
Kubernetes, Docker, Redis, gRPC, Postgres, Dgraph

Cloud & IaC
AWS, Azure, GCP, Terraform, OCI

SELECTED PROJECTS

AlpacaBot
Options-trading agent with Alpaca execution, Telegram control, and AWS hosting. GitHub

ChromaDB RAG
FastAPI semantic retrieval with centroid-based collection routing. GitHub

DriveSuite
WhatsApp bridge for Jellyfin/Sonarr with local and hosted model routing. GitHub

EDUCATION

University of Southern California
MS, Computer Science | 2020

SRM Institute of Science and Technology
BTech, Computer Science & Engineering | 2019
